

# Meeting Objectives

- Discuss shortcomings of module 2.
- Briefly discuss module 3
- Establish non-functional requirements.
- Clarify module 1 bug and establish timeline
- Begin discussion on workflow (usage of code we write)

Meet ~~at~~ 2-3 pm every monday

- Abelson 301B is backup office

Module 3:

- Unfinished

- Framework done

- Missing critical code

↗ - Should look like labview

Mod. 2:

↗ Testing - done by researchers

Play around with both

## Mod. 1:

- Note in repo. ← last commit  
get code onto computer
- only → - Executable - high priority.
- problem - Bug is super high prio
- Get data for playing around
- ~~clone~~ from team 1
- Create exec

## Non-func:

- UI, user-friendly
- ± Use and find our own issues

## Mod. 4 (potential)

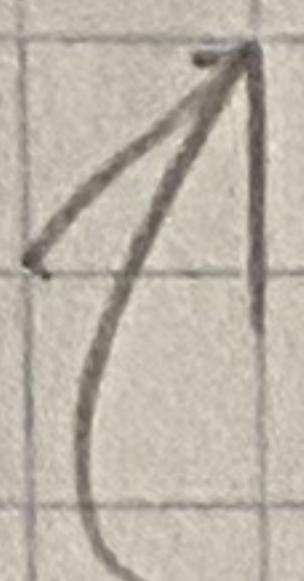

- read data in F23-SP24
- On For 2<sup>nd</sup> MS #
- transform data to mod1-3 format

## Workflow

- Historically uses emailed executables
- Also uses shared onedrive dirs
  - Preferred

Next meeting

- Complete exc
- Test Mod 1
- Run labview & mod 3

make into agenda in red

Mod 5.

- Non mass-specs
- integrate data from 3
- spreadsheet then VI

Mod 6.

- Re Mass spec
- different data & calibration
